

Field Test Feedback

We have used many renovator seeders over the past few years and have never experienced a power seeder that my employees have enjoyed using like the seeder Lawn Solutions has engineered. This seeder is extremely easy to use and maneuver throughout a complete day of work. My employees when finished for the day express that the machine performs all of the work with minimum fatigue like other units in the past. I recommend this product built by Lawn Solutions and suggest that any landscape ground maintenance company that performs such services to invest in a machine of this caliber. The end result is phenomenal!
