

Field Test Feedback

Dear Mr. Cook,

We were give an opportunity to demo your new Turf Revitalizer during the height of our fall 2006 seeding season and were pleasantly surprised. With a large volume of seeding to be done in a short period of time, we found the machine to be very capable and durable. A big plus is that the unit is lightweight and very easy to maneuver, and by design, allows the user the opportunity to do minor maintenance (i.e. change a belt) directly on the job site without the use of tools (once belt cover is removed). This is a major savings in reducing time lost on the job. The overall performance proved to be excellent.

Thanks for the opportunity to these this fine piece of equipment. I have enclosed some photos of lawn renovations performed using your machine. These lawns were completely eradicated and reseeded using the Turf Revitalizer.

Sincerely,

A handwritten signature in blue ink that reads "Stephen A. Sauter".
